

Enterprise Store Refund & Return Policy

Effective date: August 1, 2026

1. Standard Return Window

Most eligible products may be returned within 30 calendar days from the date of delivery. Some product categories have a shorter return period, which is shown in the product catalog. The product-specific return window takes precedence over the general 30-day policy.

2. Condition of Returned Products

Returned products should include the original accessories, manuals, and packaging when reasonably possible. Products that are materially damaged because of misuse, unauthorized modification, or accidental damage may be rejected for a standard refund.

3. Refund Method and Timing

Approved refunds are issued to the original payment method. Refund processing is normally initiated within 2 business days after the return is approved. Banks and card providers may require an additional 3 to 7 business days before the credit appears on the customer's account.

4. Damaged Products on Delivery

Customers who receive a product that is visibly damaged should contact customer support as soon as possible. Support may request the order number, product name, a description of the damage, and photographs. Verified delivery damage is eligible for replacement or refund review.

5. Defective Products and Warranty

A product that develops a defect after the normal return window may be handled under the applicable product warranty. Warranty duration varies by product. Accidental damage, misuse, and unauthorized modifications are not covered by the standard manufacturer warranty.

6. Non-Refundable Situations

A refund may be denied when the return window has expired, the item is excluded from returns, the product shows material misuse, or required proof of purchase cannot be verified. This policy does not limit any mandatory rights available under applicable consumer law.

7. High-Value Refunds

Refund requests above USD 500 require review by a support specialist before final approval. The review may confirm the order, return condition, payment method, and relevant policy requirements.

8. Example Product Return Windows

Product Category	Typical Return Window	Typical Warranty
General electronics	30 days	12 months
Smartphones	14 days	12 months
Large televisions	15 days	24 months
Furniture	30 days	24 months

9. Support Information

Customers should provide their order number and product details when contacting support. Support agents should never request passwords, full card numbers, or authentication secrets.
